

Assembly Instructions:

Check all parts:

- 1 Bench Top
- 1 Shelf (optional)
- 2 H Legs
- 2 Spanners (2 long pieces of wood that span lengthwise between legs)
- 4 1¼" Screws for Legs (Kit A, short screws)
- 4 2" Screws for Spanners (Kit B, long screws)
- 4 Button Plugs

Getting Started:

Turn bench top upside down on a flat surface with cardboard underneath to prevent any scratching of the surface (1).

Attaching Legs:

Use provided Hardware Kit A (short screws) to secure the H Legs into place on the bottom of the bench (2). The counter sunk holes should be facing towards the outside of the bench. Repeat for the other side of the bench (3).

Insert one of the 4 (1¼" screws) into the counter sunk holes and tighten with a screwdriver making sure it is tight. Repeat on other 3 holes (4).

Attaching Spanners:

Use the provided Hardware Kit B (long screws), and screw the 2" screw through the leg so just a little bit sticks out (about ⅛") (5). Repeat on all sides of the 4 legs (6). Place the spanners onto the screws and then tighten both screws on legs, then do opposing side legs (7). **The long side of spanner should run vertical**

Button Plugs:

Insert the button plug into the countersunk holes, and lightly tap with a hammer until the button plug is in place (8).

Flip the bench over and enjoy!
